

# HIPPO TWO

## KIDNEY/BYPASS FILTRATION SYSTEM

REMOVAL OF CONTAMINATION OR COMBINATION OF  
WATER AND CONTAMINANTS

The Perfect Filtration Hippo 2 is specifically designed for small to medium-sized applications. Its compact size allows for easy installation, while its efficiency shines in continuous filtration scenarios.

## PERFECT FILTRATION

### HYDRAULIC SYSTEMS

Ideal for power packs, tanks, and more.

### GEARBOXES

Keeps your machinery running smoothly by removing contaminants.

### LUBRICATION SYSTEMS

Ensures the purity of oils and lubricants

### GLYCOL APPLICATIONS

Effective in systems using glycol fluids.

## SPECIFICATION

- **AC Input Voltage:** 220V / 320V 525V
- **Electric Motor Size:** 1.1Kw – 1.5Kw
- **Pump Size:** 2CC – 6CC Gear Pump
- **Flow Rate:** 2.8L/min – 8.4L/min
- **Max Temp:** 60°C
- **Element Housing:** Standard or with Magnetic Filtration
- **Element Micron Rating:** 1-micron – 10-micron (Water) Nominal

## BUILT FOR SAFETY AND DURABILITY

Safety and longevity are paramount:

- **Frame:** powder-coated for corrosion protection.
- **Safety Features:** Includes an emergency stop, electronic pressure control, and mechanical pressure control.
- **Connection Points:** Fixed or mobile connections to suit various installations.
- **Pressure Control:** Internal pressure relief valve ensures safe operation.

Make the smart choice for your industrial filtration challenges and choose the Hippo 2
