

HIPPO 4 WITH PRE BAG

KIDNEY/ BYPASS FILTRATION SYSTEM

REMOVAL OF CONTAMINATION OR COMBINATION OF
WATER AND CONTAMINANTS

The Perfect Filtration Hippo 4 was designed for medium to large applications. Small and compact for easy installation. Extremely effective for continues Filtration applications.

PERFECT FILTRATION

HYDRAULIC SYSTEMS

Ideal for power packs, tanks, and more.

GEARBOXES

Keeps your machinery running smoothly by removing contaminants.

LUBRICATION SYSTEMS

Ensures the purity of oils and lubricants

GLYCOL APPLICATIONS

Effective in systems using glycol fluids.

SPECIFICATION

- **AC Input Voltage:** 220V / 320V / 525V
- **Electric Motor Size:** 1.5Kw – 2.2Kw
- **Pump Size:** 6CC – 11CC Gear Pump
- **Flow Rate:** 8.4L/min – 15.4L/min
- **Max Temp:** 60°C
- **Bag Housing:** Standard or with Magnetic filtration
- **Bag filter:** 0.5Micron – 200Micron Nominal
- **Element Housing:** Standard or with Magnetic filtration
- **Element Micron rating:** 1-micron – 10-micron Nominal

BUILT FOR SAFETY AND DURABILITY

Safety and longevity are paramount:

- **Frame:** powder-coated for corrosion protection.
- **Safety Features:** Includes an emergency stop, electronic pressure control, and mechanical pressure control.
- **Connection Points:** Fixed or mobile connections to suit various installations.
- **Pressure Control:** Internal pressure relief valve ensures safe operation.

Make the smart choice for your industrial filtration challenges and choose the Hippo 4 with pre-bag
